EDUCATION

STONY BROOK UNIVERSITY
Applied Mathematics and Statistics
Minors
- Japanese
- Filmmaking

Expected 2027

FOCUS AREAS

- Club leadership
- Event operations
- Community outreach

TECH SKILLS

- Python
- Java
- SwiftUI
- Firebase
- Web development

TABLE TENNIS

Approximately 4-5 years of playing experience, club involvement, and local tournament participation.

PROFILE

Applied Mathematics and Statistics student at Stony Brook University with table tennis club leadership and hands-on software projects spanning computer vision, karaoke training, and productivity tools. Interested in event operations, outreach, and promoting collegiate table tennis.

LEADERSHIP & CAMPUS INVOLVEMENT

STONY BROOK UNIVERSITY TABLE TENNIS CLUB — 2023 - 2026

Vice President (2025) | Treasurer (2024)

- Improved session organization by grouping players by skill and introducing randomized game rotations for efficient table use.
- Encouraged participation through personal outreach; advocated for university funding of an approximately $2,000 table despite the club's typical table cost being under $1,000.

SELECTED PROJECTS

GESTURE CONTROL — Python | Computer vision

Webcam-based Windows gesture-control application

- Supports mouse movement, clicking and dragging, app launching, window switching, customizable bindings and recorded gestures.
- Exploring future applications in table tennis pose and technique analysis; not yet implemented.

SING ALONG — Python | SwiftUI | Web

Personal karaoke training application

- Combines audio source separation, reference pitch visualization, live microphone pitch comparison, synchronized lyrics, mixing, and song management.

TODO PET — SwiftUI | Firebase

Gamified productivity and virtual pet application for sharing tasks among people | Co-created

- Combines task completion rewards with virtual pet care, focus timers, widgets, locally saved progress and documented account synchronization.

SLAPPER — Godot 4.7 | GDScript | Blender

First-person physics-driven co-op survival-horror game | In development

- Created 3D models and environments in Blender; implemented gameplay systems in Godot/GDScript; designed and built HUD, menu, inventory and settings interfaces.

ART TANK DOCUMENTARY — Documentary | 2026

Student-produced short documentary | Co-producer

- Traces the origins of Stony Brook University's ART Tank initiative and its role in student creativity, inclusion and campus placemaking.
- Featured by SBU News and published on Stony Brook University's official YouTube channel.

AI PRACTICE

Development: Claude, Codex, Kimi; Qwen, Llama, Gemma; local and quantized models, MCP integrations, iterative planning and AI-assisted coding.

Product awareness: Considers prompt-injection threats, tool-access boundaries and safeguards for consumer-facing AI applications.
